

**ZADOLLA**  
S I L V E R L I N E

2014 PRODUCT CATALOG

Many believe the 1947 Roswell incident directly led to world-altering products like transistor radios, music synthesizers, and of course, solid-body electric guitars. Since then, humans have dreamed of harnessing alien technology to create cables worthy of carrying audio signals from their source to your ears. The NEW Zaolla Silverline featuring Oyaide connectors—the only connectors compatible with alien conductors—has turned that dream into reality.

Our mission has always been to design and manufacture the finest cables in the world—regardless of cost. This means using superior materials and cutting-edge manufacturing technology to ensure optimum performance. At the heart of every Zaolla cable you will find a pure, solid-silver conductor. Compared to copper, silver offers less resistance and, hence, improves signal conductivity—translating to audio signals that exhibit deeper bass and pristine highs.

Beyond the solid-silver conductors, Zaolla Silverline cables are carefully constructed and optimized for specific applications. For example, Zaolla Silverline guitar cables utilize a sophisticated hybrid conductor combining the primary solid-silver core with a stranded-copper ancillary conductor to achieve flat frequency response for signals that remain true to the source.

Never afraid to evolve and improve an already superior product, Zaolla Silverline has scoured the globe for the right connectors. In Oyaide, we found an attention to detail and passion to create something special. Oyaide connectors use the finest metals with manufacturing of the highest standards. The combination of Zaolla and Oyaide results in a cable with unparalleled signal transfer rates and best-in-class durability.

## Oyaide Connectors

Proudly manufactured in Japan to the highest standards of precision since 1952, each Oyaide connector features solid-silver or silver-plated phosphor bronze contacts for optimum conductivity. To further enhance each contact, rhodium plating is added for the ultimate protection against corrosion. The finishing touch is a chrome-plated housing for enhanced durability and a striking appearance.

### XLR Connectors

- Each contact is made from solid phosphor bronze for direct connection to conductor
- Two-step plating process adds silver for conductivity and rhodium for protection
- Unique one-touch locking mechanism ensures a secure connection every time

### 1/4 inch Connectors

- Each contact is made from solid phosphor bronze for direct connection to conductor
- Two-step plating process adds silver for conductivity and rhodium for protection
- Chrome-plated brass housing provides unmatched protection on the road

### RCA Connectors

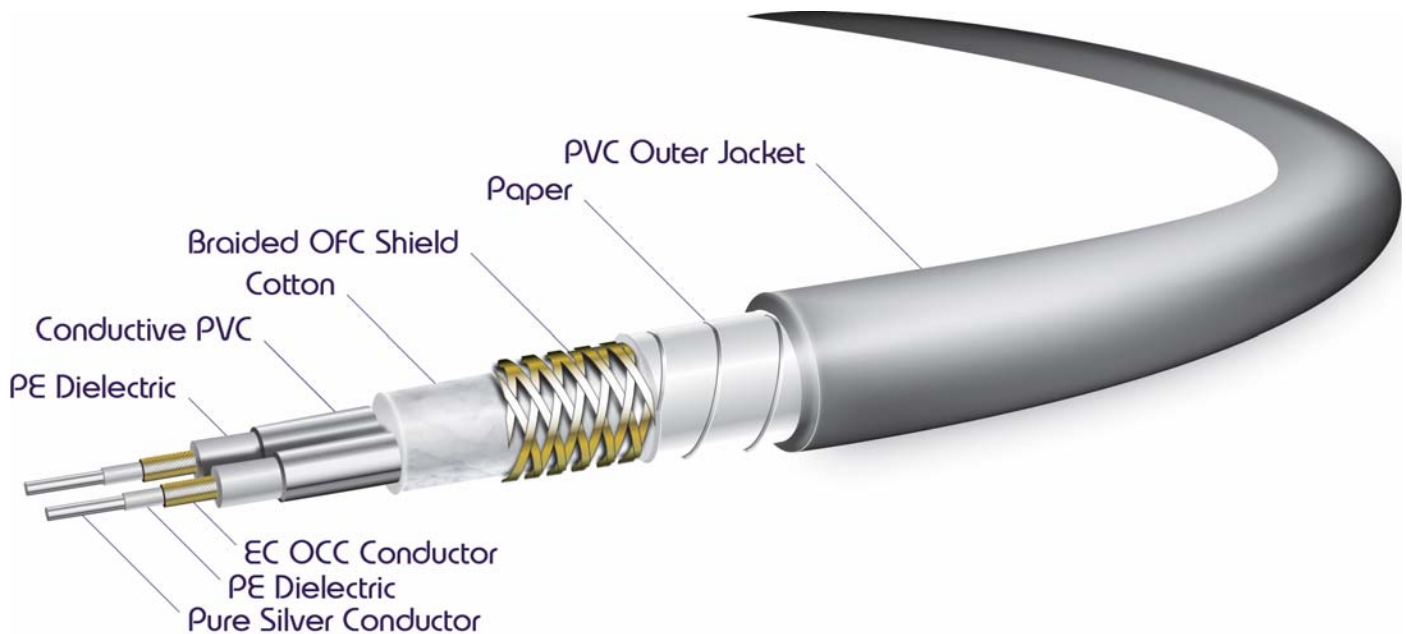

- Each hand-polished contact is made from solid silver for unrivaled conductivity
- Rhodium plating delivers incomparable protection against corrosion and wear
- PTFE dielectric provides true 75-ohm impedance

### BNC Connectors

- Each hand-polished contact is made from solid silver for unrivaled conductivity
- Rhodium plating delivers incomparable protection against corrosion and wear
- PTFE dielectric provides true 75-ohm impedance

## Microphone Cable

Zaolla Silverline Microphone Cables fully embrace the conductive properties of solid silver to provide the most transparent signal transfer possible. Redundant shielding and true microphone-cable geometry protect it from outside interference while maintaining flexibility on stage or in studio.

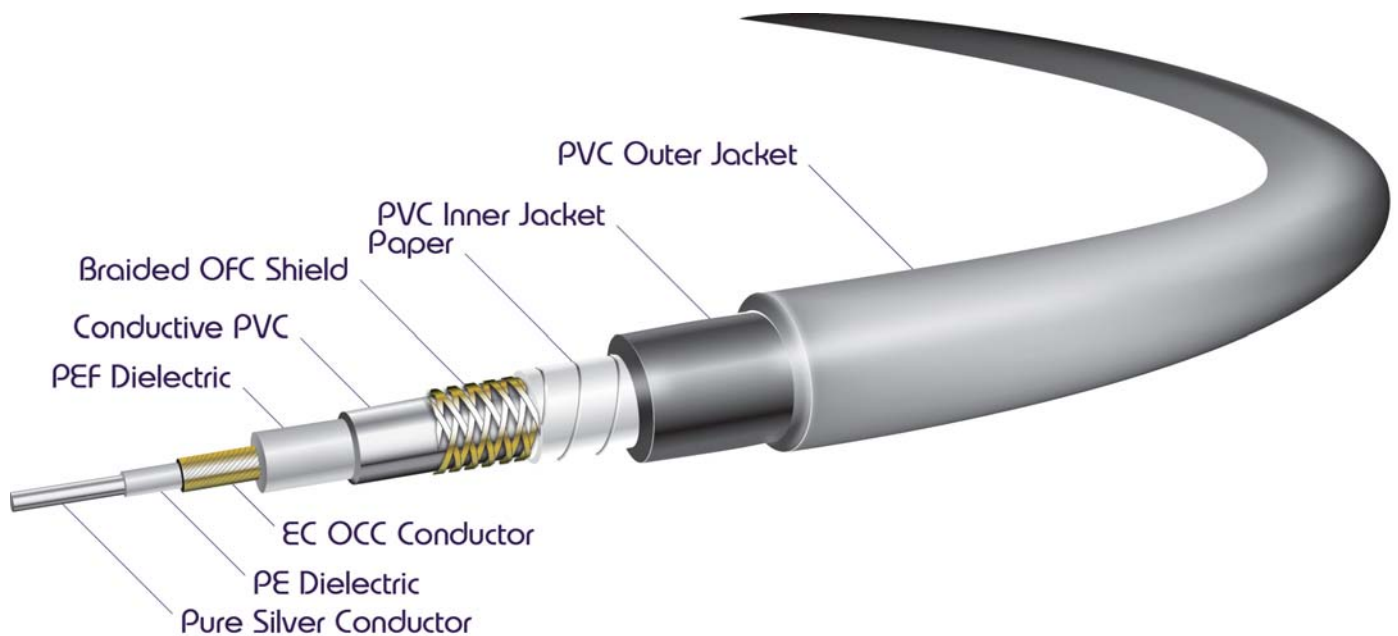

- Solid-silver conductors for improved high-frequency transmission and increased headroom for overtones
- Stranded-copper outer conductors to boost midrange frequencies for flat frequency transmission
- High-density, oxygen-free copper braid for durable and effective EMI/RFI rejection
- Conductive PVC to absorb electrostatic interference and provide additional EMI/RFI rejection

## Microphone Cable

Oyaide XLR3F to XLR3M

<i>Model</i>	<i>Length</i>	<i>MSRP</i>
ZMC-103	3 ft	\$269.95
ZMC-105	5 ft	\$309.95
ZMC-110	10 ft	\$419.95
ZMC-115	15 ft	\$534.95
ZMC-120	20 ft	\$639.95
ZMC-125	25 ft	\$754.95

## Guitar Cable

Zaolla Silverline Guitar Cables fully embrace the conductive properties of solid silver to provide the most transparent tone possible. Their redundant shielding and true coaxial-cable geometry protect your sound from interference while maintaining flexibility on stage or in studio.

- Solid-silver inner conductor for improved high-frequency transmission and increased headroom for overtones
- Stranded-copper outer conductors to boost midrange frequencies for flat frequency transmission
- Precision foamed polyethylene dielectric to minimize capacitance and high-frequency attenuation
- High-density, oxygen-free copper braid for durable and effective EMI/RFI rejection
- Conductive PVC to absorb electrostatic interference and provide additional EMI/RFI rejection

## Guitar Cable

Oyaide Straight to Same

<i>Model</i>	<i>Length</i>	<i>MSRP</i>
ZGT-003	3 ft	\$119.95
ZGT-005	5 ft	\$149.95
ZGT-010	10 ft	\$199.95

## Limited Lifetime Warranty

All Zaolla Silverline cables purchased in the USA are warranted by Zaolla Silverline to be free of defects in material and workmanship for the lifetime of the original purchaser.

In the event of such defects, Zaolla Silverline will repair or, at our option, replace the warranted product if delivered to Hosa, prepaid, together with the sales receipt or other dated proof of purchase. This warranty excludes defects due to normal wear, abuse, shipping damage, or failure to use the product in accordance with the instructions.

ZAOLLA SILVERLINE OR HOSA TECHNOLOGY, INC. SHALL NOT BE LIABLE FOR DAMAGES BASED UPON INCONVENIENCE, LOSS OF USE OF THE PRODUCT, LOSS OF TIME, INTERRUPTED OPERATION OR COMMERCIAL LOSS, OR ANY OTHER DAMAGES, WHETHER INCIDENTAL, CONSEQUENTIAL OR OTHERWISE. This warranty gives you specific legal rights, and you may have other rights, which vary from state to state.

**100% ALIEN TECHNOLOGY**
