

## Hosa Technology Audio Cable Tester CBT-500

The Hosa Audio Cable Tester is an easy-to-use unit that allows you to verify continuity of cables prior to use. Testing cables minimizes problems that may arise during sessions.

### Battery Check

It is recommended that you run a battery check before testing cables to ensure the unit is in working condition

1. Turn the center knob clockwise until the dial reaches the "Battery Check" indicator
2. The LED will illuminate if the battery has sufficient power

### Basic directions

1. Identify the two ends of your cable and find the corresponding jacks on the top or sides of the cable tester
2. Plug one end of your cable on the left side of the unit
3. Plug the other end of the cable to the corresponding jack on the right side of the unit
4. Turn knob to contact "1" indicator
5. Turn knob clockwise one click at a time to test each subsequent contact on the cable

### How to Read LED Indicators

#### Yellow and green LEDs marked 1-8

- The yellow LEDs indicate the possible contacts of the connector plugged into the right side of the tester
- The green LEDs indicate the possible contacts of the connector plugged into the left side of the tester
- When a connection exists between the contact selected and any other contact, the corresponding LEDs will illuminate

#### Red LED marked GND

- This LED will illuminate if a connection between a pin and the connector's shell is detected

#### Yellow LED

- When using the included test leads, this LED will illuminate, accompanied by sound, to indicate continuity
