

# Synth Playground

When it comes to modular synthesizers, it's all about the patch. As the signal leaps from one module to the next, it evolves into something new. The result is a unique sonic experience with a stunning roadmap formed by intricately woven, brightly colored patch cables. The music, lights, and colors take you back to a childhood of fun and games.

## Knucklebones

Knucklebones are stand-alone mults that quickly increase your creative options. Simply patch into one of its jacks and you'll have five duplicates of the outbound signal. Grab 'em by the handful and keep the signals bouncing.

Features include:

- 1-to-5 mult facilitates more complex patches
- Bright color & unique shape make it easy to find
- Available as singles or in packs of 10

Quantity	Model
1 pc	GMM-105
10 pc	GMM-105-PAK

## Hopscotch

Hopscotch Patch Cables are the ideal solution when a signal must jump to two places at once. Tap into the built-in jack to split a signal or line them up to create a daisy chain in your modular rig.

Features include:

- Easy-access pigtail jack for quick signal splitting
- Slim housings to fit crowded spaces
- Color-coded by length as listed below

Length	Model
1.5 ft (45 cm)	CMM-545Y
Various Lengths (1 of each listed in color chart)	CMM-500Y-MIX

### Hopscotch Cables Color Chart

Color	Length (cm)	Length (ft)
Red	15	0.5
Orange	30	1
Yellow	45	1.5
Green	60	2
Blue	90	3

## Patch Cables

Hosa Unbalanced Patch Cables are vital to any modular synth rig. Each pack features eight assorted-color patch cables and is available in four length options. Pick them up in every length—you can never have too many.

Features include:

- Bright colors for easy identification
- Slim housings to fit crowded spaces
- Also available with 1/4-inch phone plugs

Length	Model
6 in	CMM-815
1 ft	CMM-830
1.5 ft	CMM-845
3 ft	CMM-890
